

Size Guide

1. Before printing this pdf, please make sure that you have selected "None" in the drop-down menu of the "Page Scaling" section in the print dialog box.
2. Use a ruler to confirm that the scale corresponds to the scale shown at the right of this document (200 mm).
3. To determine your ring size:
 1. Choose a ring you wear on the same finger you want to measure.
 2. Place your ring on the different circles that appear in this document. The circle that corresponds exactly to your ring indicates your ring size (the size is the number noted inside the circle).
 3. If your ring falls between two sizes, always choose the greater of the two.
